# Leverage the Largest Network in the Industry

SambaSafety offers the most comprehensive driver data network in North America. We are constantly growing and expanding our services, offering License Verification in 39 states and counting. SambaSafety is also the ONLY solution on the market providing License Verification in the state of California.

IMPROVE OVERALL ACCURACY AND EFFICIENCY

70% of a book of business is clean. SambaSafety saves carriers significant time and money by quickly identifying the 30% of drivers that present the most risk. This enables underwriters to confidently pull MVRs only for the high-risk population.

SambaSafety offers an affordable, stair-step approach for identifying and pricing risk. For underwriters, License Verification is just the first step in this incremental approach. Once the driver is identified, the carrier can confidently order an activity check to look back up to five years of violations on a driver's MVR. If this activity check passes, no further checks or expenses are required. If activity is found, you can configure fast, automated rules to determine next steps – which may then include purchasing a full MVR if desired.
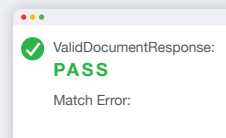

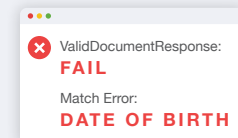

LICENSE VERIFICATION PROCESS

1 Input

Florida DRIVER LICENSE
A012-345-67-890-1
Jane Doe

2 Match

Data Input	State	Result
Sample	Sample	True
Janice	Janice	True
99999999	99999999	True
08/04/1968	08/04/1968	False

3

Pass
